

## Turn hidden used-market recalls into OEM-paid Repair Orders.

Recall visibility, dealer-to-dealer coordination, eligibility controls, and measurable fixed ops ROI.

Validates open-recall status using NHTSA/VIN data, applies OEM authorization by rooftop/store code, and delivers an actionable VIN list before outreach starts.

Captures RO #, service hours, and dollars—proving ROI while establishing your dealership as the servicing dealer of record for future routing.

Moves each opportunity through lifecycle stages—from discovery to scheduled service lane arrival—driving accountability and operational discipline.

Enables dealer-to-dealer execution with contact management, call/email workflows, activity tracking, and booking links for efficient scheduling.

### Recall Intelligence Platform

Recalls Near Me™ is a recall intelligence platform built for OEM-authorized service departments to capture missed OEM-paid recall volume in nearby used inventory.

From 25-mile market scans and VIN validation with eligibility filters to structured outreach and completed Repair Orders, the platform turns recall capture into a predictable fixed-ops growth and retention channel.

### Key Benefits

- ✓ Capture local open recall volume
- ✓ Prioritize closest VIN wins
- ✓ Dealer-to-dealer outreach workflow
- ✓ Track recalls to Repair Orders
- ✓ Create repeatable OEM-paid revenue
- ✓ Strengthen recall compliance

Co-Founder & CEO

*“For too long, open recalls in the used market have been invisible to the OEM service centers that can fix them. We built Recalls Near Me™ to change that. When Fixed Operations teams can see recall-ready VINs sitting on nearby dealer lots, recall work becomes a repeatable growth channel—not a reactive scramble. Our goal is simple: give dealerships the intelligence and workflow to capture manufacturer-paid repairs, coordinate dealer-to-dealer, and return safer vehicles to the road.”*
